

Press release

Laser Hockey now available for Fun4Four

Laser Hockey is the brand new title in the amazing game range of the Fun4Four game table. It delivers a whole new and futuristic feel of air hockey and feels like the original arcade on a huge touch screen in a futuristic floor. From the clink of the mallets against the puck to the hum of air from the rink itself, this game faithfully recreates every element of the known experience.

The gaming floor is surrounded by colored panels, the puck is a laser lighted ball, and the mallet is a glowing colored disk. The sound of the puck hitting the mallet has an unearthly though wholly appropriate echo to it. It feels like something out of *Tron*. With its bright colors and unique look, Laser Hockey is pure fun.

It features colorful graphics, a smooth and responsive gameplay. The game provides a two-player mode, plus an extra widening and narrowing four-player mode. Challenge head-to-head or play in the enhanced mode on every corner of the amazing game table.

To increase difficulty extra features were added. This different mode features several nice additions. In an enhanced match, the mallets decrease in size or grow up, the gravity tend to your goal or to your opponents or the whole screen get a blurred skin.

Challenge with your friends and hit the scores.
