## Modem installation instruction for Beetle and Beetle Max

### Beetle:

For the installation of a modem in a Silverball Beetle it is only necessary to ensure that the graphics card is located on the 3rd PCI slot. So you can insert the modem in the second slot.

The modem are available in the TAB replacement parts department under the following numbers:

|   |             |
|---|-------------|
| PC Modem PCI internal 56k               | 831.800-050 |
| PC Modem PCI internal 56k (nur ab V5.5) | 831.800-053 |
| PC Modem PCI internal ISDN              | 831.800-051 |

For the installation of the telephone cable you have to break out the plate on the backside of the Beetle.

**Beetle Max:**

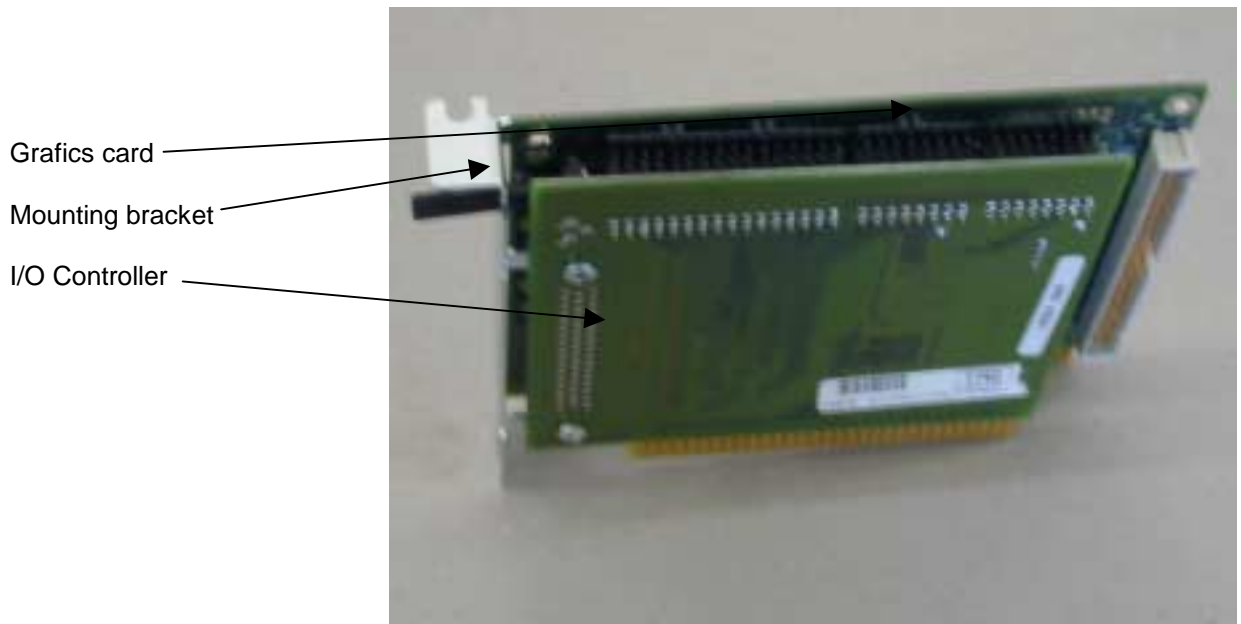

For the installation of a modem in a Beetle Max or a Beetle Karaoke it is necessary to order a special mounting bracket on which I/O controller and the graphics card have to be fixed.

The bracket is available in the TAB replacement parts department under the following number:

Mounting bracket for I/O Controller and graphics card 022.080-209

Fix the two cards with screws (M3x6) like shown in the picture below.

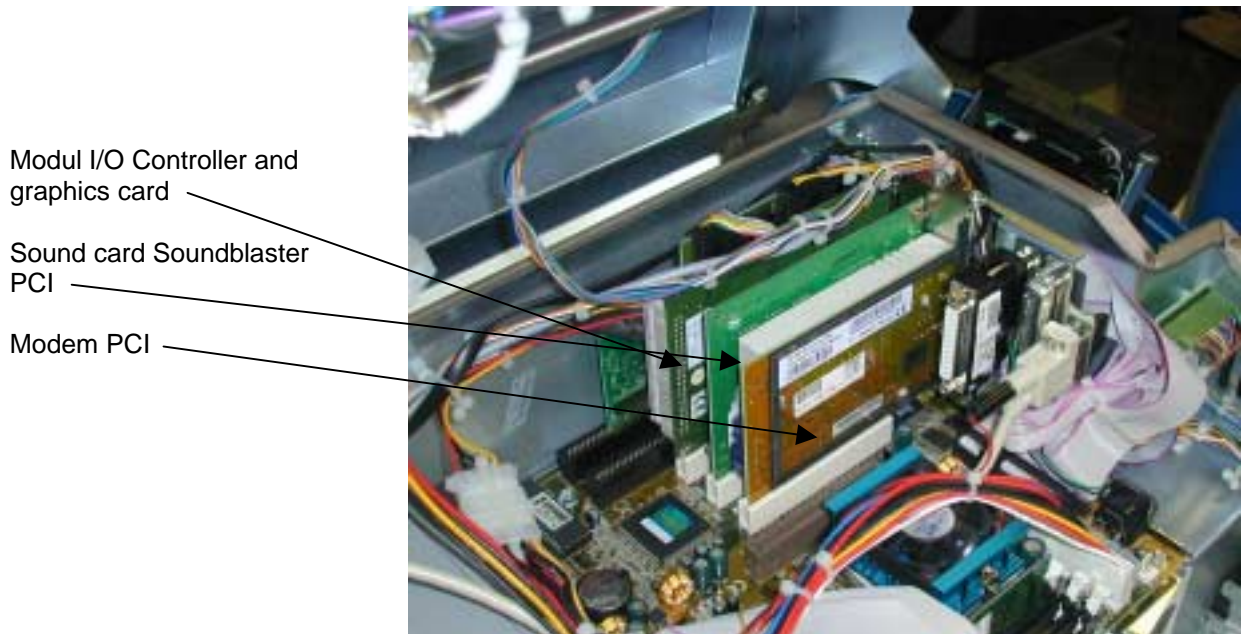

**ATTENTION:** Only possible with the graphics card shown below !

Insert the module (I/O Controller and graphics card) next to the ISA sound card.

So you get one PCI slot free for the modem installation.

For the arrangement of the cards please see the following picture:

The modem are available in the TAB replacement parts department under the following numbers:

|   |             |
|---|-------------|
| PC Modem PCI internal 56k               | 831.800-050 |
| PC Modem PCI internal 56k (nur ab V5.5) | 831.800-053 |
| PC Modem PCI internal ISDN              | 831.800-051 |

For the installation of the telephone cable you have to break out the plate on the backside of the Beelte Max.
