Update disk download

Support - FAQ

Support - Download

Back

To do this, you need:

- a fast internet connec
- a PC with Windows 2
- an update disk from T
- Please follow the link

After you have put the update

Save the file „PrepareDisk2“, with clicking the right mouse button on the link and choose the option „link save as“.

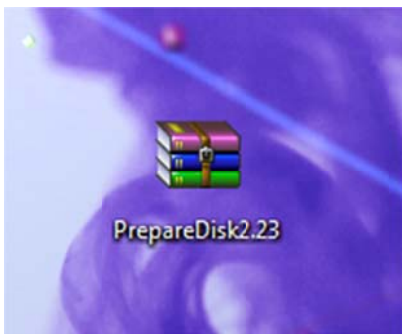

## PrepareDisk-Tool (Version 1.08)

This tool prepares a hard disk for use with the TAB [UpdateDisk Download Tool](#).  
All files on this disk will be erased.

Download: [PrepareDisk2 \(V2.23\)](#)

## 2. Start

Open the target directory in which the file is saved and unpack it.

Open the program with a double click on „PrepareDisk2“.

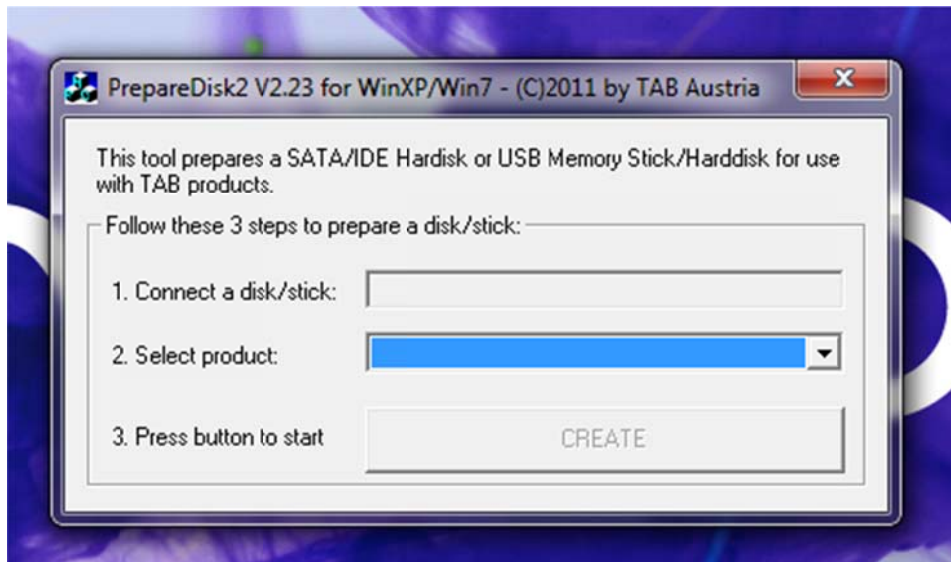

Name	Änderungsdatum	Typ	Größe
AMPEDec.dll	23.11.2004 23:50	Anwendungserwe...	188 KB
boot	19.11.2004 11:26	Konfigurationsein...	1 KB
bootsect	14.07.2009 12:08	Anwendung	95 KB
guide PrepareDisk	12.10.2011 11:30	Textdokument	3 KB
IO.SYS	05.05.1999 21:22	Systemdatei	218 KB

ntldr	04.09.2002 15:11	Datei	229 KB
PrepareDisk2	02.11.2011 10:05	Anwendung	576 KB

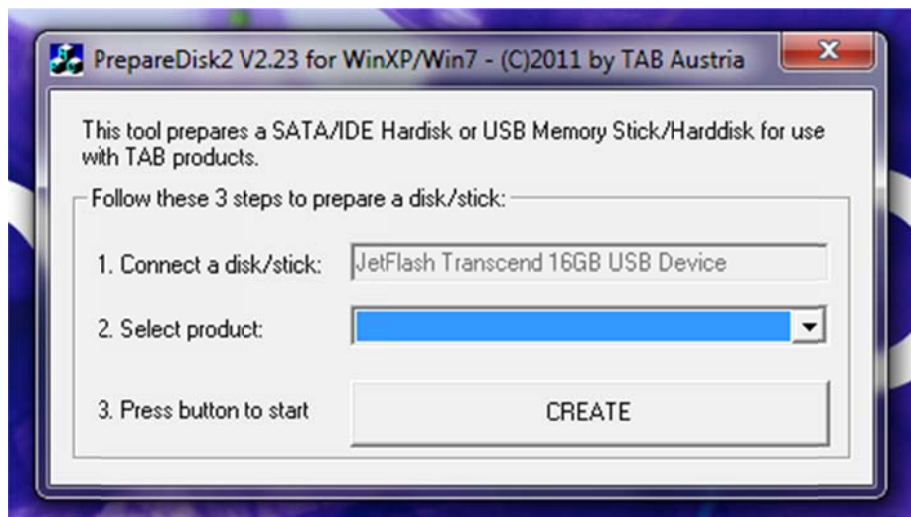

### 3. Create

After starting you will see this screen:

Plug in your USB – stick, your extern hard disk or your update disk with a dock connector on your pc.

The program will automatically display the signification of the stick or the disk in the grey box.

You have now the possibility to create a few different update disks.

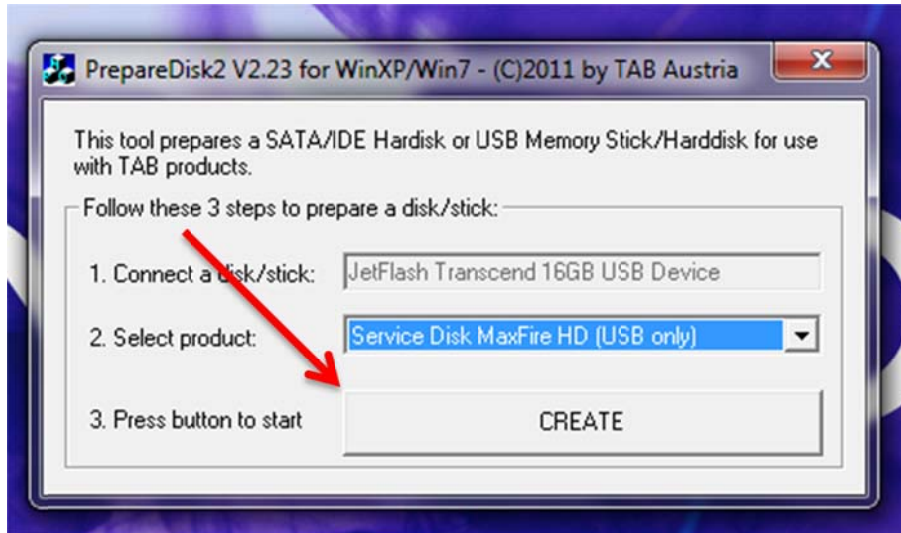

Here you find a little more information about the difference between them:

- Service Disk Max Fire 2 (IDE only)
  - o This is the update disk for updating music and commercial pages on Max Fire 2
- Service Disk Max Fire HD (USB only)
  - o This is for external hard disks and sticks with USB plug, also for updating music and commercial pages on Max Fire 2 and Max Fire HD.
- Update disk „Cashpoint“
  - o Preparation for downloading the update disk of the Cashpoint software
- Update disk „Demodisk“
  - o Preparation for downloading the update disk of the Demodisk software
- Update disk „Fun4Four“
  - o Preparation for downloading the update disk of the Fun4Four software
- Update disk „Golden Island 2“
  - o Preparation for downloading the update disk of the Golden Island software
- Update disk „Max Fire / Video“
  - o Preparation for downloading the update disk of the Max Fire 2 software
- Update disk „Max Fire HD“
  - o Preparation for downloading the update disk of the Max Fire HD software
- Update disk „Silverball Pro/Classic“
  - o Preparation for downloading the update disk of the Silverball Pro / Classic software
- Update disk „Silverball XP“
  - o Preparation for downloading the update disk of the Silverball Strato software

Click now the button „Create“ and the stick or disk will automatically be deleted and new partitions will be created.

The program formats all the partitions on the disk and creates new folders. If you want to create a service disk, it will be ready after you clicked create. Update disks must be downloaded from our website after the format.

For that you have to login in your OTM account again and click the link „support – update disk download“. Then choose „update disk download“ on the left side and follow the steps on the screen.
