This technical information describes you the program „**TAB Prepare Disk Tool**“.

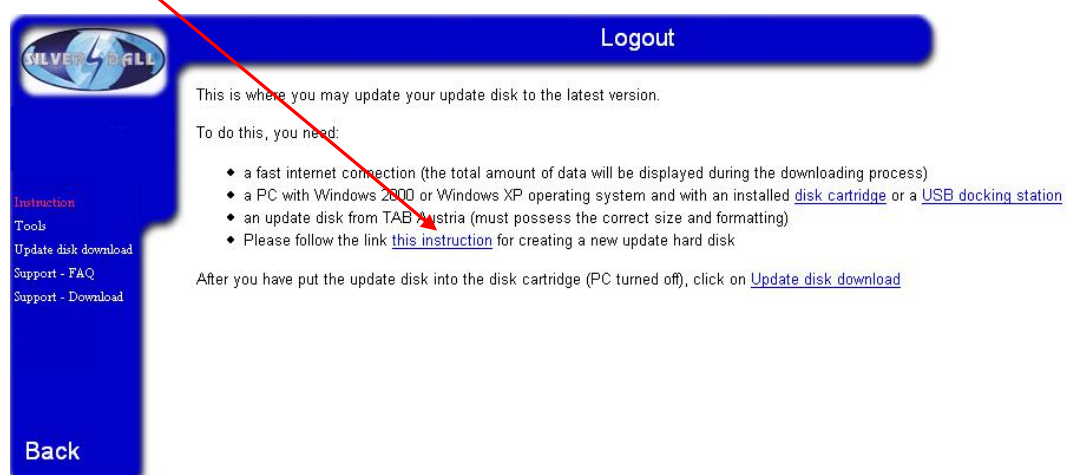

Using this program recommends good PC-Technical knowledge!

## 1. Downloading

- With the link [www.tab.at/otm](http://www.tab.at/otm) you get directly to the OTM Login page. If you do not have an OTM account, you can register one. Detailed information can be found in the **OTM Manual** which can be downloaded directly here: [LINK](#)
- Choose now „Support / Update disk download“ (picture)

- At **Point 4** you can find the instruction and the program (picture)

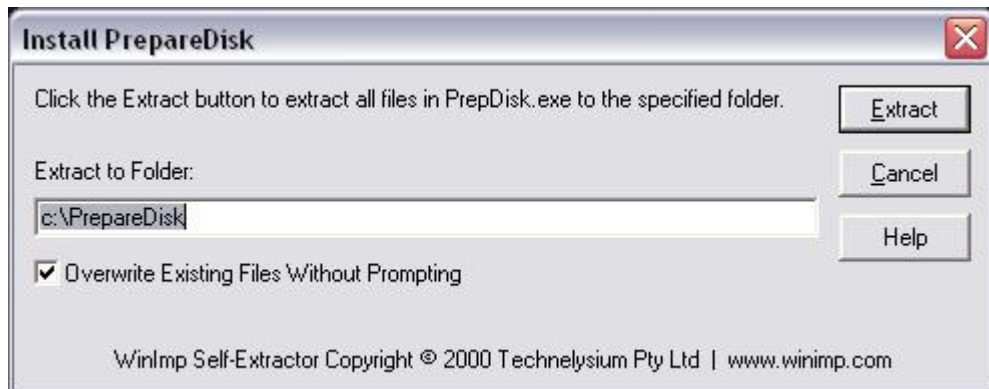

- Save now „PrepDisk.exe“ on your PC

## 2. Install the program

- e. Start the installation file „PrepDisk.exe“ and choose an installation path

- f. „Extract“ copies the files into the directory

## 3. Start-up

- g. You can find now the files in the directory  
h. Connect now an USB stick or any hard disk with USB smart panel.  
i. If you add and choose the medium in the Windows Explorer start the program with „PrepDisk.exe“

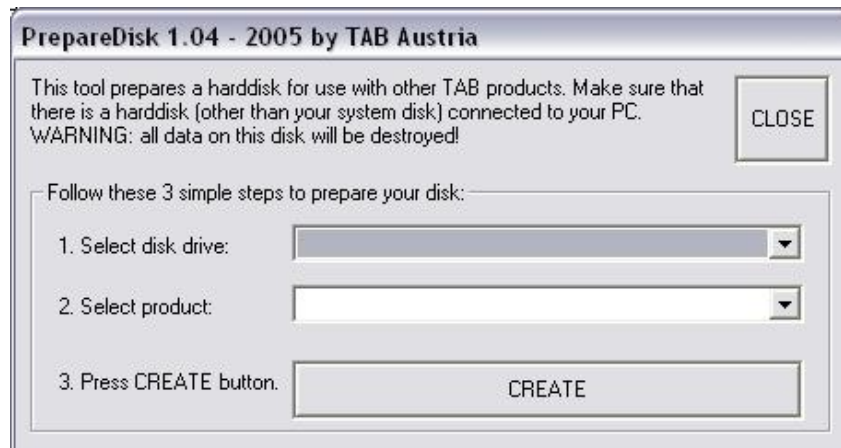

Name	Size
AMPEDec.dll	188 KB
Anleitung PrepareDisk.txt	1,22 KB
boot.ini	189 bytes
boot98.bin	932 bytes
IO.SYS	217 KB
MFC71.dll	1,01 MB
MPEHashGen.exe	336 KB
msvcr71.dll	340 KB
NTDETECT.COM	46,4 KB
ntldr	228 KB
PrepDisk.exe	28 KB
readme.txt	1,17 KB
SysConfig.dll	524 KB
version	7 bytes

## 4. Choose

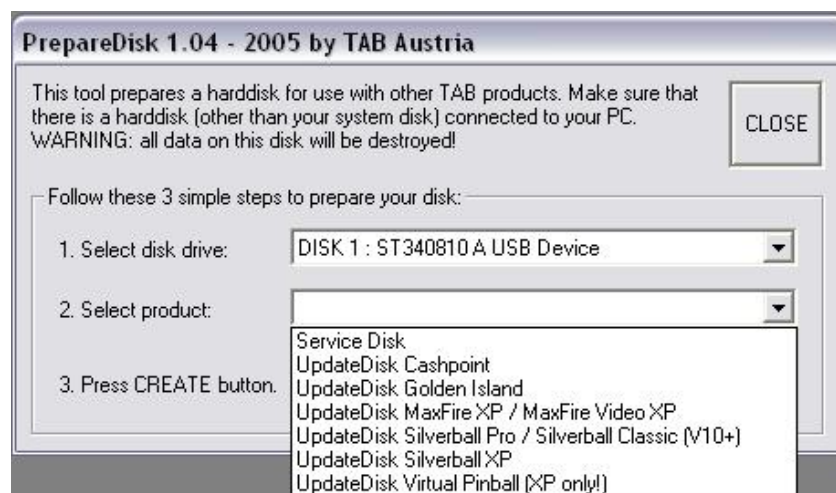

- j. After starting you'll get this screen

- k. Choose now the connected medium

- l. Now choose the product which you want to create

## **5. Create**

- m. With “Create” the medium gets formatted and the product is ready

### **Attention:**

New created update disks have to make a complete download. The program “Prepare Disk” formats this disk and creates the partition on it. Also it creates 2 files which are responsible for detecting the hard disk on our download tool. The complete software files have to be downloaded after that process.

## Notes
